-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2838

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3 and 65-72 drawn to a particular structure of a system for use with a power supply comprising a current control device, classified in class 323, subclass 364.
 - II. Claims 4-62, drawn to a particular structure of a circuit for coupling an energy storage device to an output of a first power supply comprising a differential high-gain device, classified in class 363, subclass 50.
 - III. Claim 63, drawn to a particular method for coupling an energy storage device to an output of a power supply including step of generating a feedback signal, classified in class 323, subclass 282.
 - IV. Claim 64, drawn to a particular method for coupling an energy storage device to an output of a power supply including step of generating a reference signal, classified in class 323, subclass 220.

The inventions are distinct, each from the other because of the following reasons:

2. Invention I and inventions II-IV are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the system for use with a power supply as claimed in Group I, claims 1-3 and 65-72, does not necessary contain particular elements or steps as claimed in Groups II-IV, claims 4-64.

BEST AVAILABLE COPY

Art Unit: 2838

The subcombination has separate utility such as systems for use with a power supply and methods therefor as claimed in Groups I-IV can be used without a current control device.

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is suggested to select one group at a time.

4. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Matthew V. Nguyen whose telephone number is (571) 272-2081.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2800.
